

Alpine builds the most flexible blown film systems up to 9-layers for high performance barrier films.

- Fast, efficient material transitions
- Exceptional gauge uniformity at high throughputs
- Ultra thin barrier and tie layers
- Advanced bubble management results in excellent roll geometry

Alpine provides engineering, technical service and spare parts from our headquarters in Natick, MA, USA

- Turnkey installations and commissioning
- Remote trouble shooting with online diagnostics
- All spare parts orders are shipped directly from Natick
- Servicing more than 550 installed lines in North America

Alpine's NEW Machine Direction Orientation technology enhances selected film properties including:

- Tensile strength
- Transparency
- Modulus
- Barrier
- Facilitates down gauging
